# One single stylization dimension?

# Overview of Experiments

1. Looking for Important Scales
  - a) Shape and Material
  - b) Lighting and Shading
  - c) Texture
2. Check for Generalization
3. Importance of Expression

# Experiment Design

- 20 or more participants/experiment
- university students (avg. age 24)
- all variations rated by each participant
- seven-point Likert scales
  
- Analysis
  - Repeated measure ANOVA
  - Tukey HSD for post-hoc

# STIMULI CREATION

angry

happy

neutral

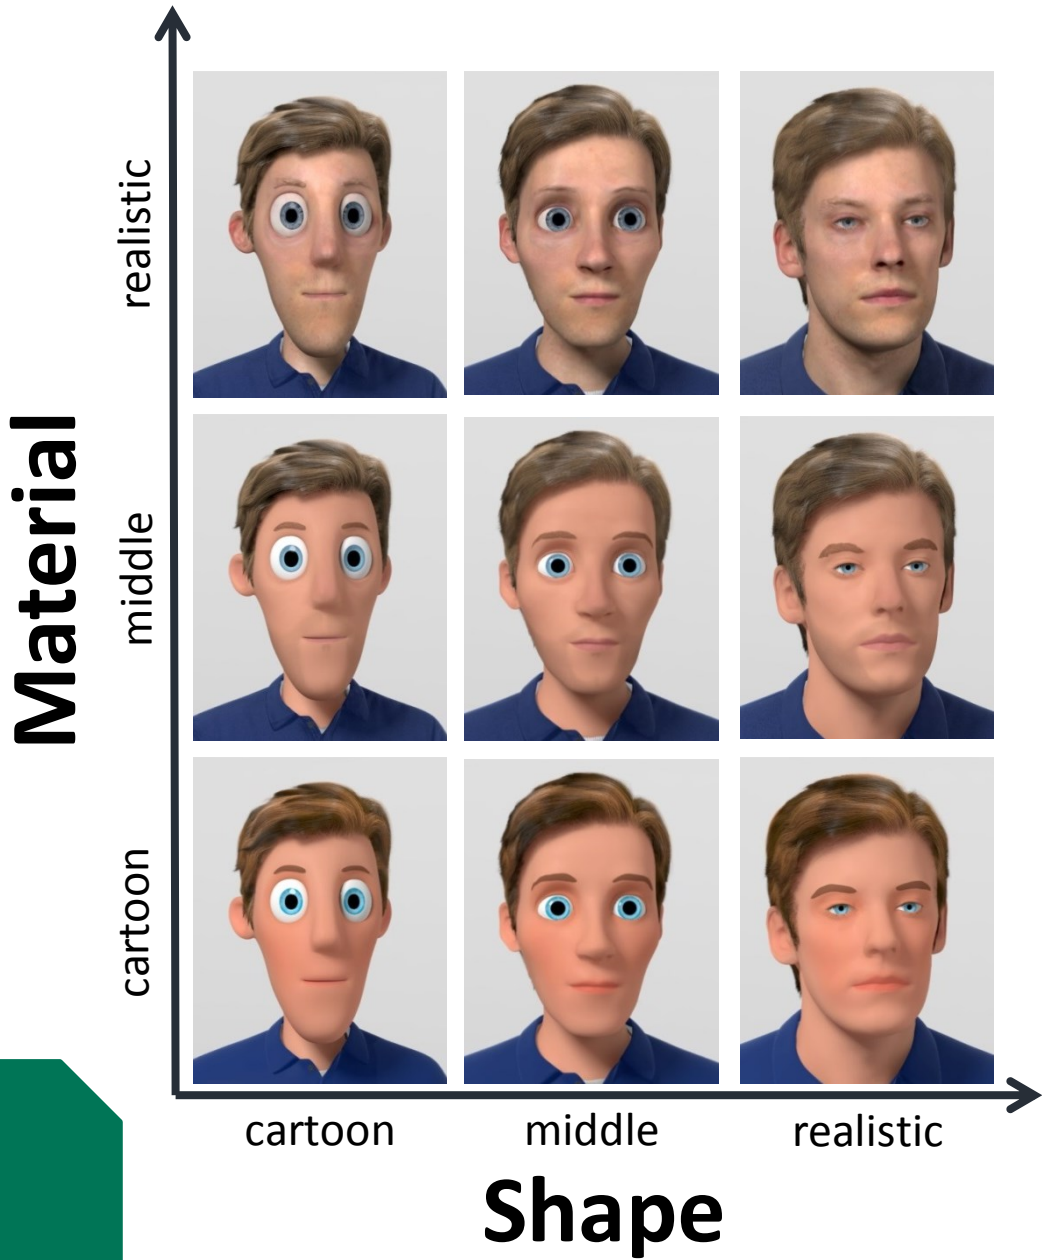

sad

surprised

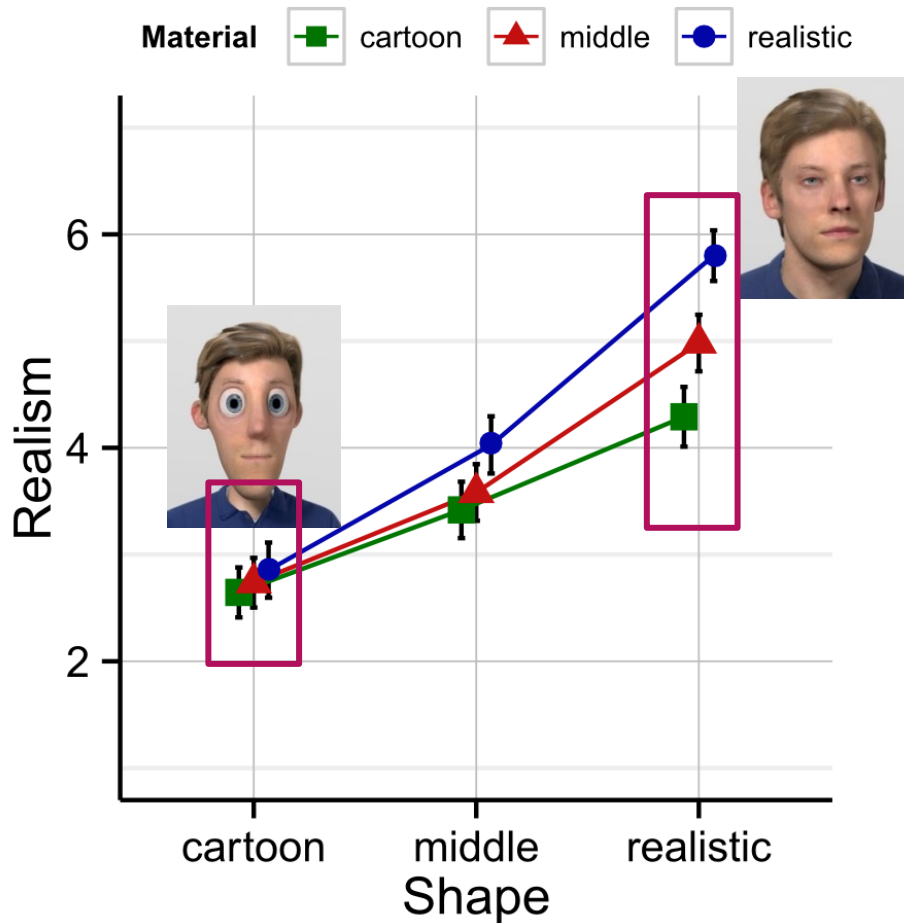

**ca. 400 stimuli in total**

Experiment 1a

# SHAPE AND MATERIAL

# Results - Realism

- mainly affected by shape

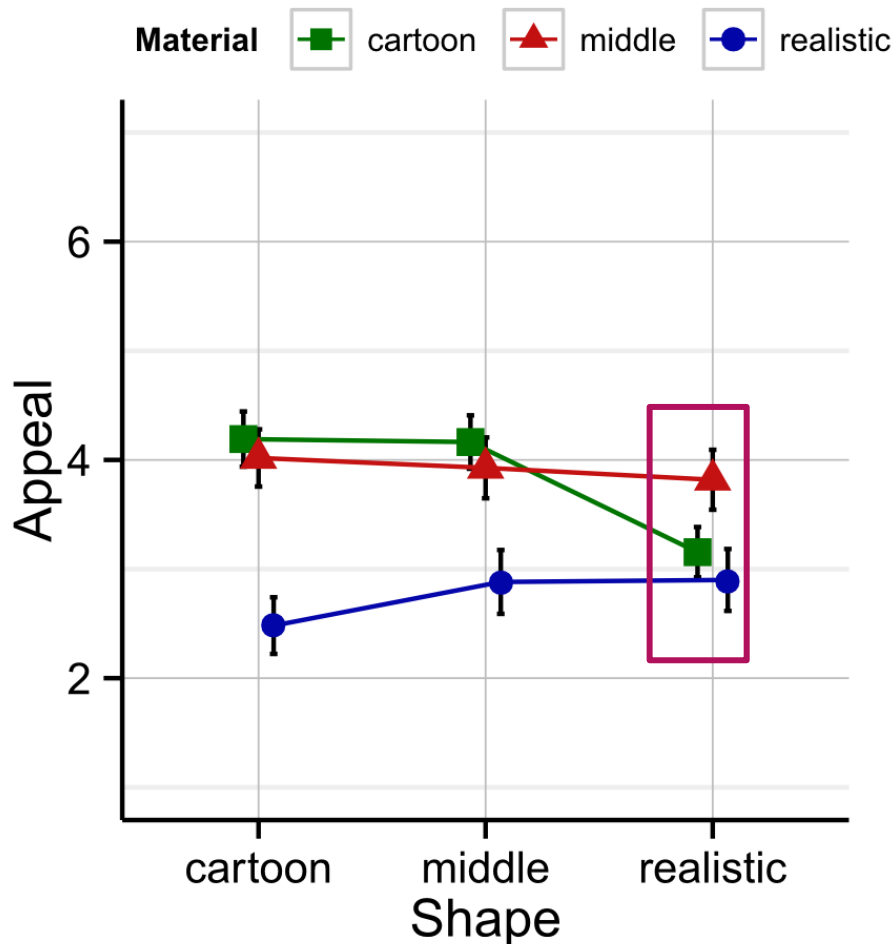

👍 realistic materials for realistic shapes

👎 realistic materials for stylized shapes

# Results - Appeal

 realistic materials

 strong mismatches in stylization

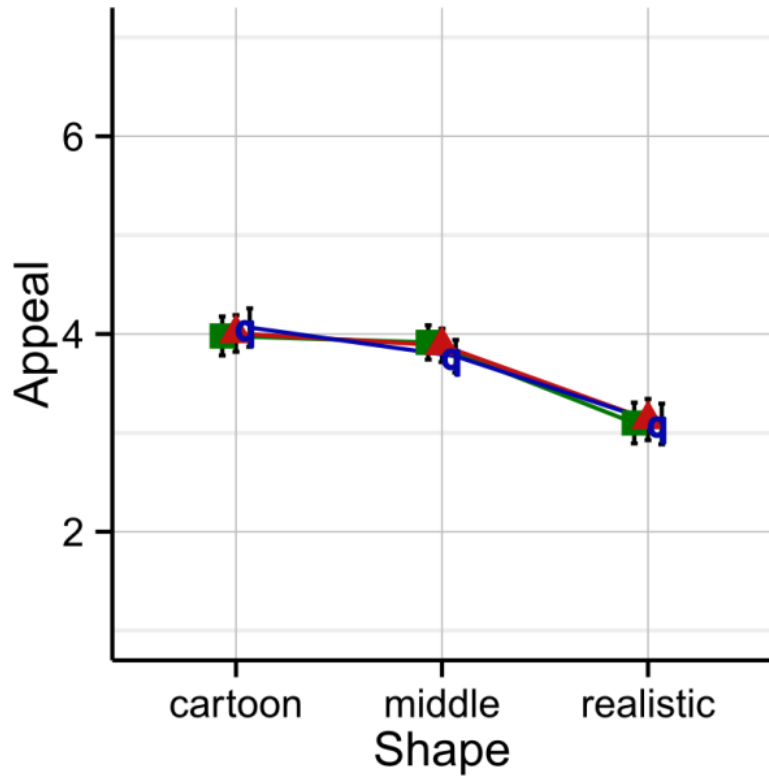

- similar to familiarity and reassurance scales

Experiment 1b

# SHADING AND LIGHTING

# Results - Appeal

middle

realistic

blur 25px

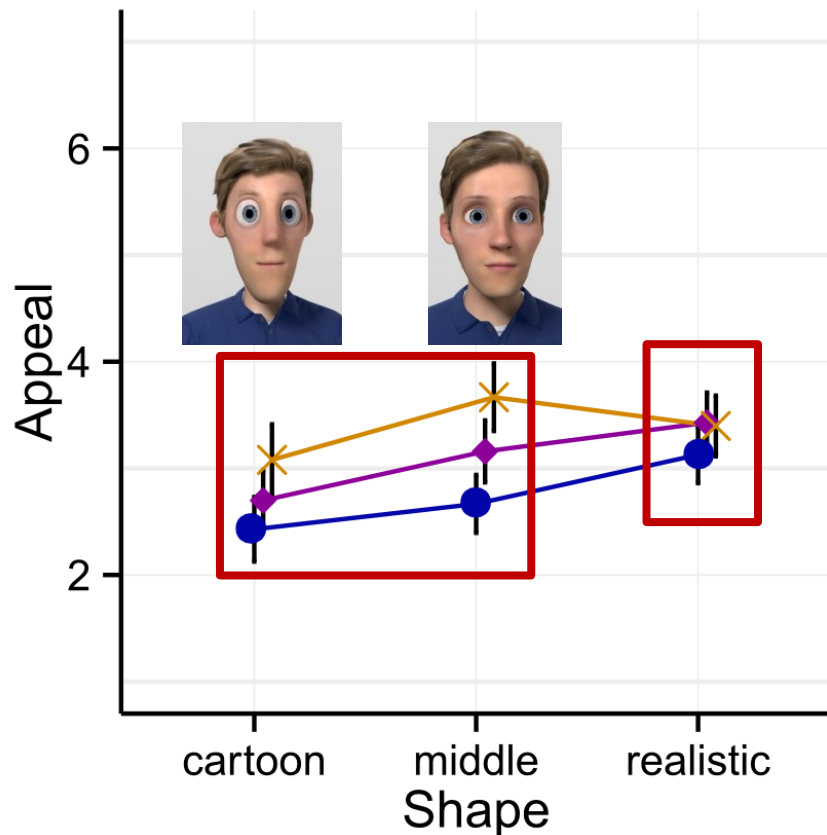

blur 50px

Experiment 1c

# TEXTURE

# Results

Material  realistic  25px blur  50px blur

■ realism non-significantly affected

👍 blurred textures

👍 for realistic shapes not significant, but widely accepted in research [Fink and Matts 2008]

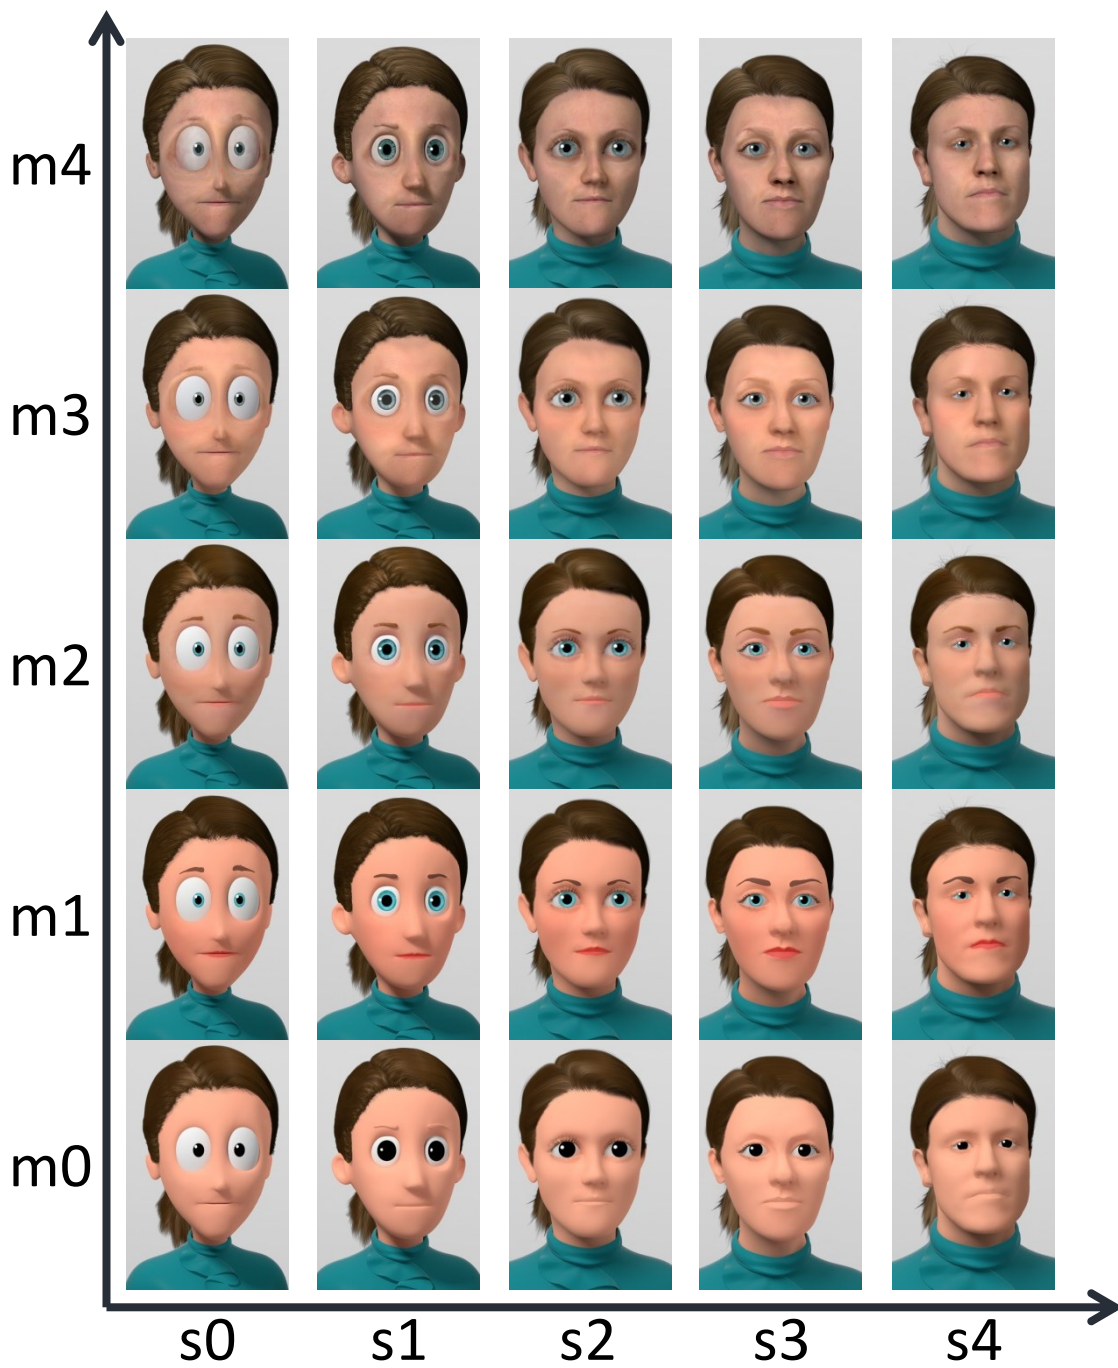

even  
pigmentation

Experiment 2

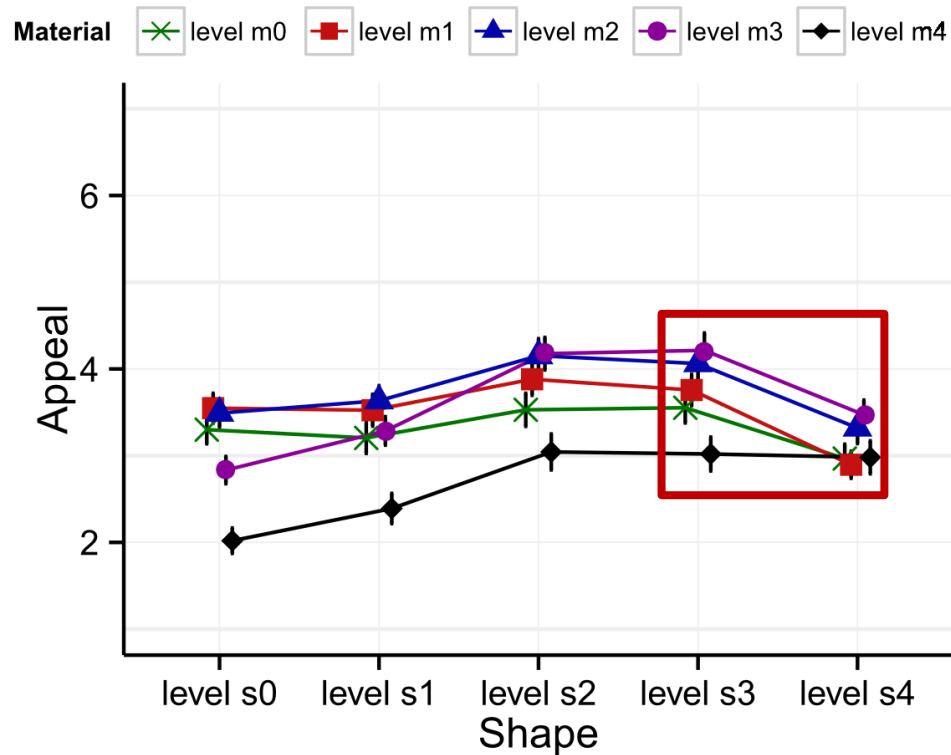

# SHAPE AND MATERIAL

**Material**

**Shape**

# Results

✓ realism results confirmed

👍 even skin pigmentation

👍 realistic materials

👎 strong mismatches in stylization

• • •

angry

happy

neutral

sad

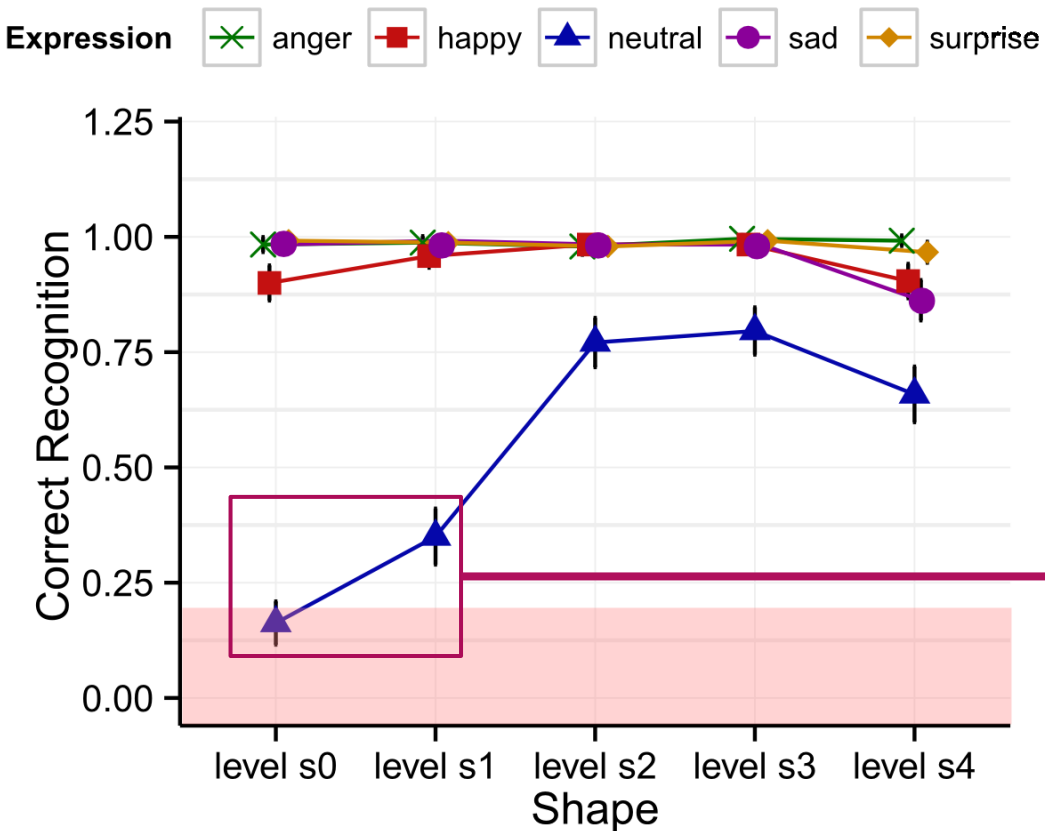

surprise

Experiment 3

# EXPRESSION

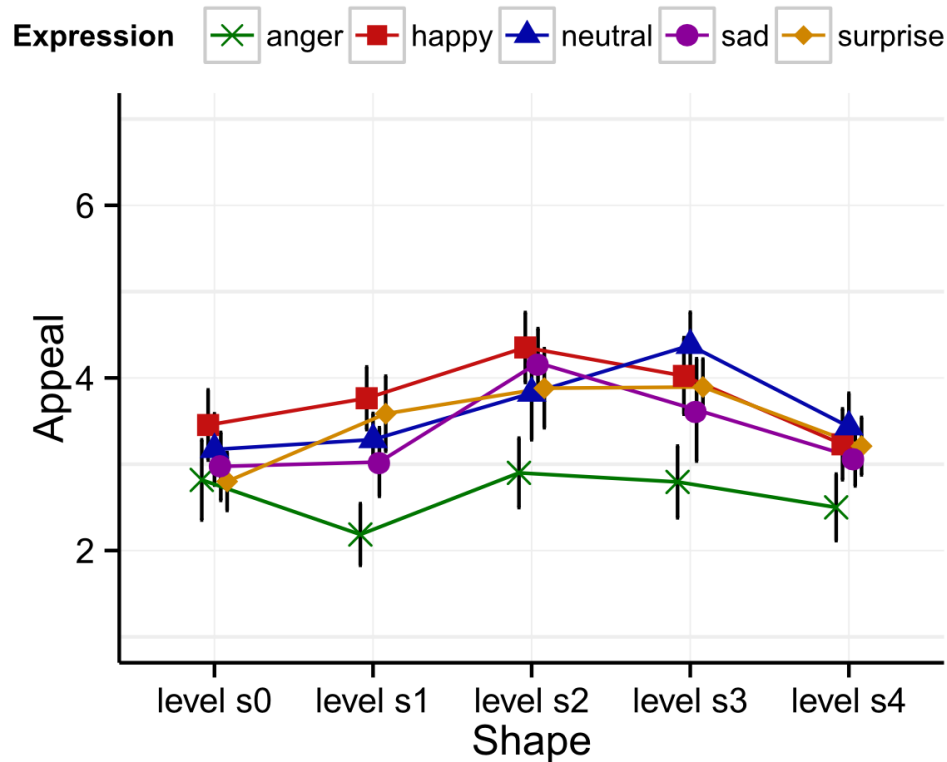

# Expression Recognition

👍 mostly outstanding recognition  
(20% random pick)

Mixed with weak surprise

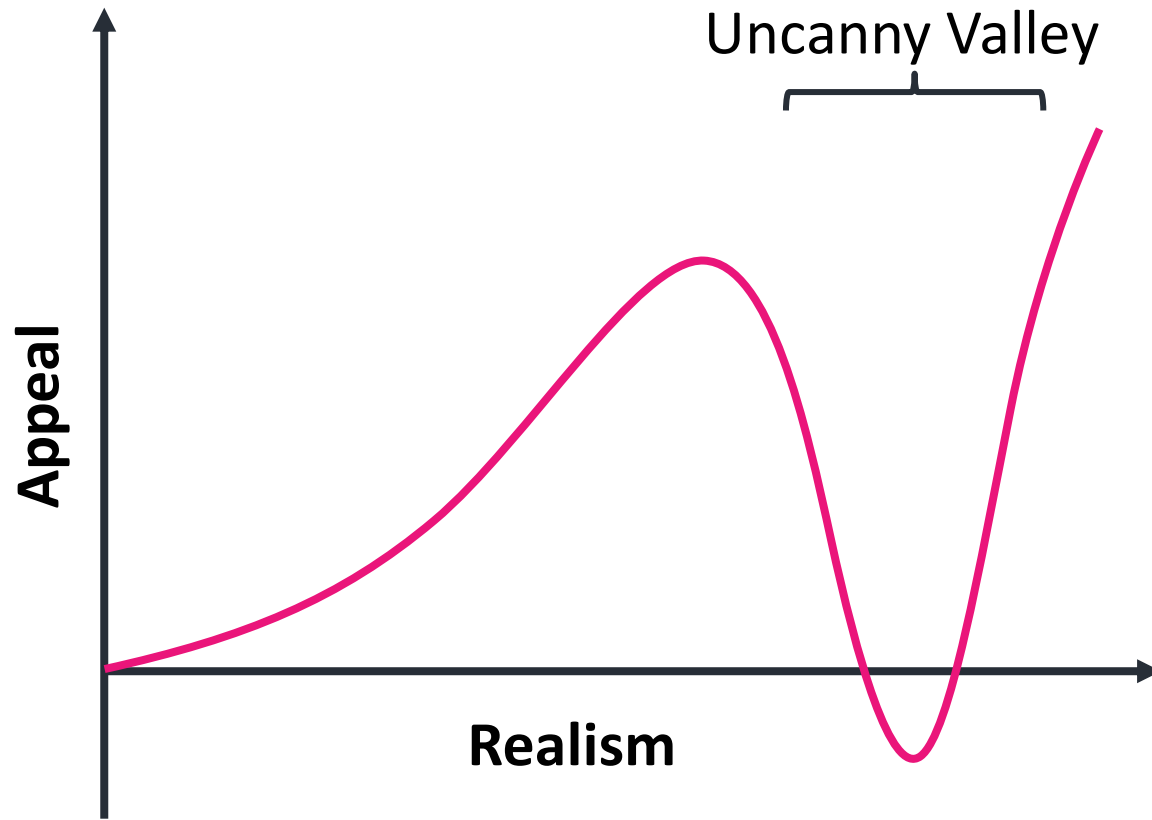

# Expression - Appeal

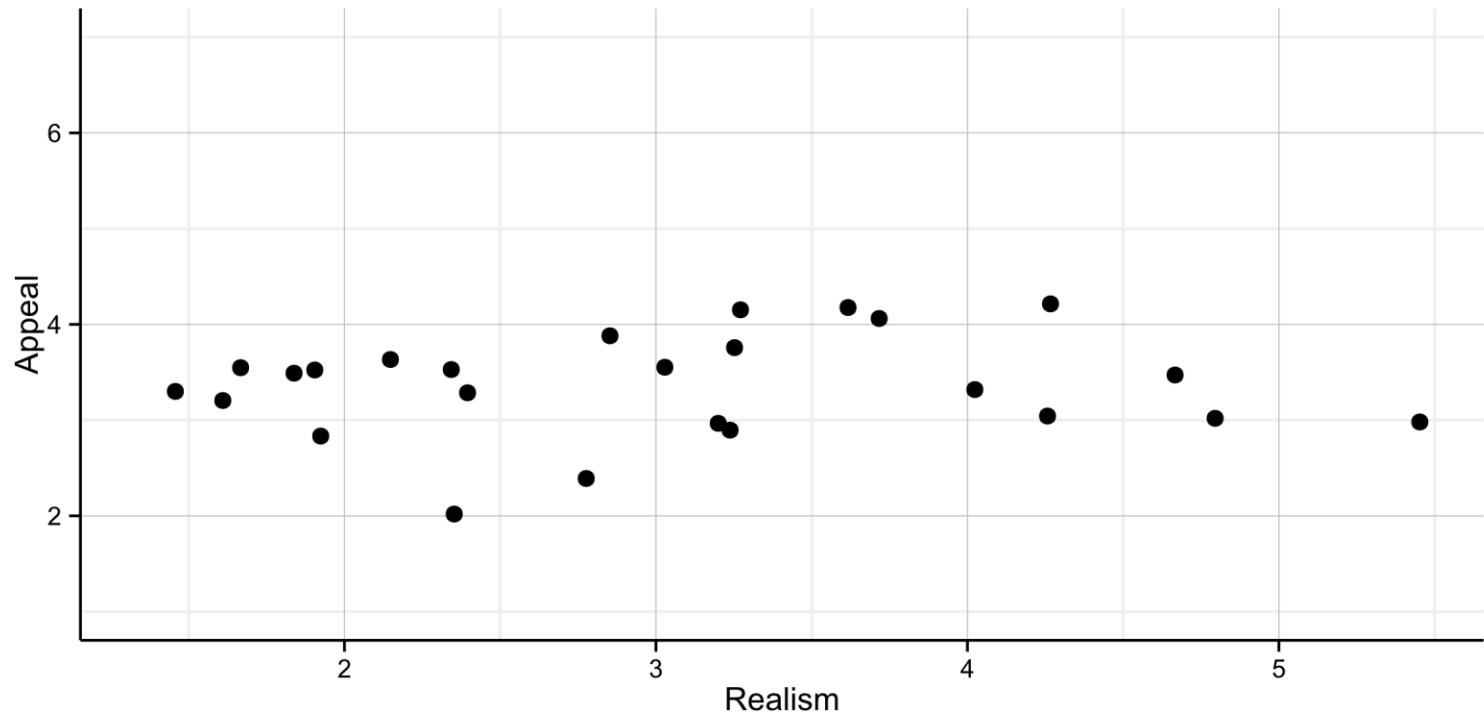

- expressions vary

 anger  
(negative expression)

**CONCLUSION**

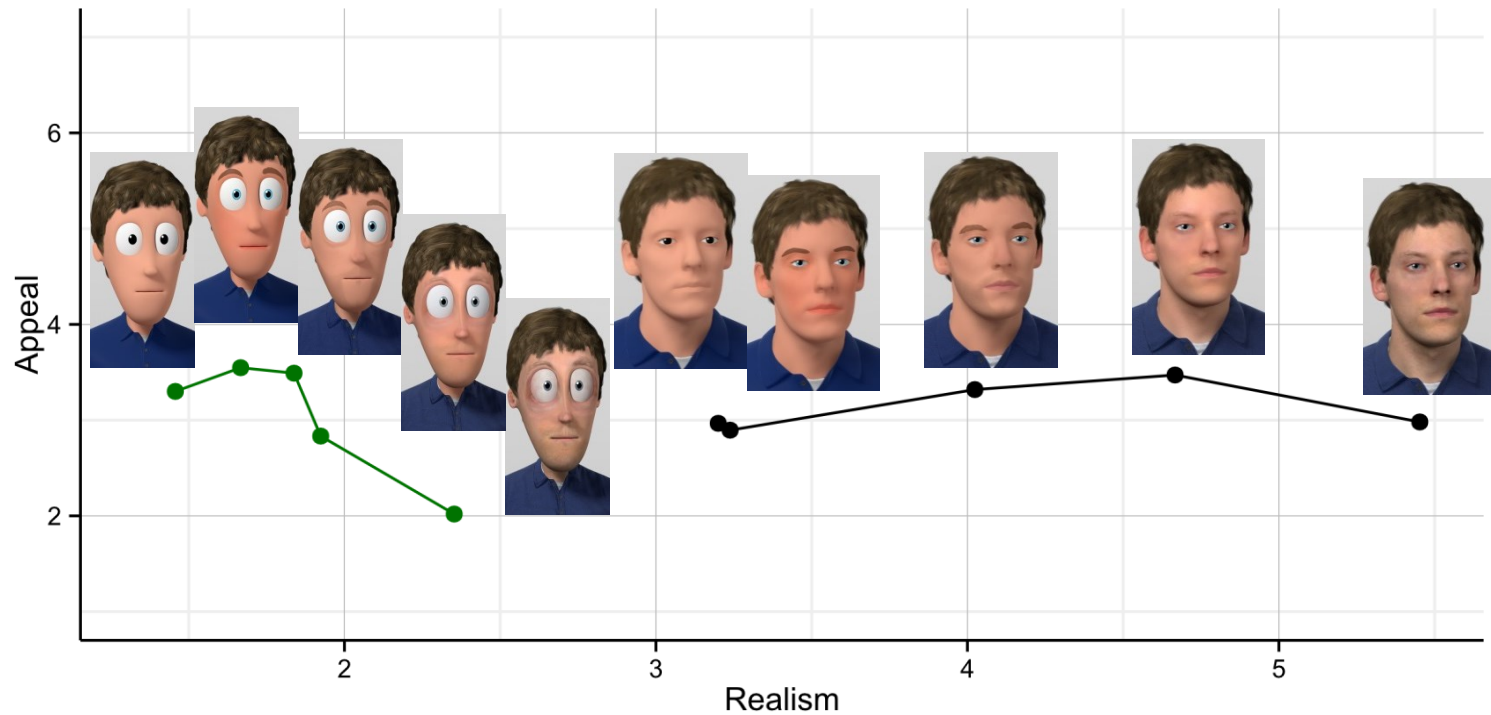

# Conclusion

- material (texture) influences appeal

# Conclusion

**realistic  
Material**

**realistic  
Shape**

**realistic  
Shape & Material**

# Conclusion

- differentiation between shape and material crucial
- peak at material style  $\approx$  shape style

- realistic albedo with uneven pigmentation
- non-matching material and shape stylization
- angry expression

- smooth skin
- matching material and shape stylization
- neutral/positive expression
- read paper!
